

# Did you know?

*It takes on average **17 years** to move research into clinical practice*

**We want to speed this up....**

**.....and we need your help to do it**

Do you want to make a difference to healthcare locally, nationally and internationally?

Do you have professional, personal or volunteering experience of the NHS, health related community groups or charities?

Do you have links with NHS groups (PPGs, CCGs etc), charities, public networks or healthcare practice?

## **LINK -Lay Involvement in Knowledge Mobilisation**

We meet bi-monthly at Keele University for 3 hours

**"With all the effort (and resource) that goes into producing research evidence, it's important that the efforts of research teams are not wasted. As a member of the LINK group, I know that I'm helping to do this. Through LINK, I work as part of a team to think of creative/innovative ways of presenting research to ensure findings are taken up quickly and effectively."**
